PRIVACY ACT ISSUANCES, 1991
COMPILATION
EXPLANATION

This multivolume biennial compilation contains:
—descriptions of systems of records maintained on individuals
by Federal agencies which were published in the FEDERAL
REGISTER as required by the Privacy Act of 1974;
—rules of each agency which set out the procedures that
agencies will follow in helping individuals who request
information about their records.

AUTHORITY

This compilation of Privacy Act Issuances is published by the
Office of the Federal Register in compliance with the requirements

CUTOFF DATES

This compilation reflects rules and notices of systems of records in
effect as of December 31, 1991.

TITLE AND FORM OF CITATION

The official title of this publication is “Privacy Act Issuances, 1991
Compilation. To cite a system of records or rule in this publication,
the form of citation would be:
Privacy Act Issuances, 1991 Comp., Volume ..., p....

HOW TO USE THIS COMPILATION

Identify the system you think may contain information about you
and the agency that maintains those records.
Read the agency’s regulations following its systems of records to
determine the procedures you must follow to obtain information
from that agency.

INFORMATION YOU CANNOT GET

There are limitations to the kind of information you can get. The
agency may refuse to let you see information that—
—Relates to national security;
—Could reveal a confidential source; or
—Could be used to give people an unfair advantage on a
government examination.

Generally, an agency’s system notices (description of its systems of
records) and its regulations will describe that agency’s limitations on
release of information.

SOME GENERAL REQUIREMENTS
How To Make a Request

In most cases you can inquire in person or by mail. It will be easier
for the agency to help you, and your request will be handled more
quickly, if you follow these procedures:
1. Give your full name and address, and sign your request.
2. Specify the system(s) of records you believe contain information
   about you.
3. Provide the relevant information required by the system you are
   interested in. For example, if you are inquiring about any contract
   you have had with the Government (loan application, contract, grant
   application, etc.), give the date and subject matter, and any identifying
   numbers that appear on documents you received.
4. Address your request to the official or person and address given in
   the system entry.
5. Print the words “PRIVACY ACT REQUEST” on the front of
   the envelope.

Proof of Identity

The agency will need some proof of your identity such as—
1. A document with your full name and address;
2. A document that has your signature and/or your photograph
   such as a passport, medicare card, or unemployment insurance book.
3. Any other identification specified in the system entry or regulations.
   If your request is by mail, you should include copies of whatever
   documents the agency requires to prove your identity. There is a
   penalty for making false statements.

Fees

The agency may charge you a fee for a copy of your records, but
they may not charge you for the time and expense of locating them.
The agency’s rules usually state how much the fee is.

How Systems of Records are Arranged

Department of the Army records are identified by the number of the directive which prescribes that those records be created, maintained, and used. For example, a system of records about assignment of military personnel may be found in the "assignments, details and transfers" area, the 614 series; medical treatment records are in the "medical services" area, the 40 series. Some subjects, such as investigations, are treated as sub-elements of a series, e.g., "criminal investigations", "security investigations" and "intelligence investigations". "Criminal investigations" are found in the 195 series; "security investigations" are found in the 380 series and "intelligence investigations" are found in the 381 series.

However, "civilian personnel investigations" are not covered by Army systems of records notices; they are covered by Office of Personnel Management systems of records notices—in this case, under "OPM/GOVT-4". The following list is a general guide to subjects which are retrieved by personal identifier and are in the Army systems of records notices. Office of Personnel Management systems of record notices which identify records in the temporary custody of the Army have been added to this guide; they bear "OPM/GOVT, OPM/CENTRAL, AND EEOC/GOVT" identification numbers.

How To Use the Index Guide

To locate a particular system of records, follow the general guide below. The series in which the subject is located corresponds to the system notice identification number. For example: Pay records for military and civilian personnel are in the 37 series; comparable system notices are A0037-104-3bSAFM and A0037-105SAFM, respectively. The first letter, "A", represents the Army, the number (37-104-3) is the prescribing directive, and the suffix letters are internal management devices. Systems of records notices are published in numerical sequence by identification number. They are further identified by name, location and category of individuals covered by the notice.

REQUESTING RECORDS

Records are retrieved by name or by some other personal identifier. It is therefore especially important for expeditious service when requesting a record that particular attention be provided to the Notification and/or Access Procedures of the particular record system involved so as to furnish the required personal identifiers, or any other pertinent personal information as may be required to locate and retrieve the record.

BLANKET ROUTINE USES

Certain blanket 'routine uses' of the records have been established that are applicable to every record system maintained within the Department of Defense unless specifically stated otherwise within a particular record system. These additional blanket routine uses of the records are published below only once in the interest of simplicity, economy and to avoid redundancy before the individual record system notices begin rather than repeating them in every individual record system.

ROUTINE USE-LAW ENFORCEMENT

In the event that a system of records maintained by this component to carry out its functions indicates a violation or potential violation of law, whether civil, criminal or regulatory in nature, and whether arising by general statute or by regulation, rule or order issued pursuant thereto, the relevant records in the system of records may be referred, as a routine use, to the appropriate agency, whether Federal, state, local, or foreign, charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, rule, regulation or order issued pursuant thereto.

ROUTINE USE-DISCLOSURE WHEN REQUESTING INFORMATION

A record from a system of records maintained by this component may be disclosed as a routine use to a Federal, state, or local agency maintaining civil, criminal, or other relevant enforcement information or other pertinent information, such as current licenses, if necessary to obtain information relevant to a component decision concerning the hiring or retention of an employee, the issuance of a security clearance, the letting of a contract, or the issuance of a license, grant or other benefit.

ROUTINE USE-DISCLOSURE OF REQUESTED INFORMATION

A record from a system of records maintained by this component may be disclosed to a Federal agency, in response to its request, in connection with the hiring or retention of an employee, the issuance of a security clearance, the reporting of an investigation of an em-
ployee, the letting of a contract, or the issuance of a license, grant or other benefit by the requesting agency, to the extent that the information is relevant and necessary to the requesting agency’s decision on the matter.

**ROUTINE USE-CONGRESSIONAL INQUIRIES**

Disclosure from a system of records maintained by this component may be made to the Office of Congressional office from the record of an individual in response to an inquiry from the Congressional office made at the request of that individual.

**ROUTINE USE-PRIVATE RELIEF LEGISLATION**

Relevant information contained in all systems of records of the Department of Defense published on or before August 22, 1975, may be disclosed to the Office of Management and Budget in connection with the review of private relief legislation as set forth in OMB Circular A-19 at any stage of the legislative coordination and clearance process as set forth in that Circular.

**ROUTINE USE-DISCLOSURES REQUIRED BY INTERNATIONAL AGREEMENTS**

A record from a system of records maintained by this component may be disclosed to foreign law enforcement, security, investigatory, or administrative authorities in order to comply with requirements imposed by, or to claim rights conferred in, international agreements and arrangements including those regulating the stationing and status in foreign countries of Department of Defense military and civilian personnel.

**ROUTINE USE-DISCLOSURE TO STATE AND LOCAL TAXING AUTHORITIES**

Any information normally contained in IRS Form W-2 which is maintained in a record from a system of records maintained by this component may be disclosed to state and local taxing authorities with which the Secretary of the Treasury has entered into agreements pursuant to Title 5, U.S. Code, Sections 5516, 5517, 5520, and only to those state and local taxing authorities for which an employee or military member is or was subject to tax regardless of whether tax is or was withheld. This routine use is in accordance with Treasury Fiscal Requirements Manual Bulletin Nr. 76-07.

**ROUTINE USE-DISCLOSURE TO THE OFFICE OF PERSONNEL MANAGEMENT**

A record from a system of records subject to the Privacy Act and maintained by this component may be disclosed to the Office of Personnel Management concerning information on pay and leave, benefits, retirement deductions, and any other information necessary for the Office of Personnel Management to carry out its legally authorized Government-wide personnel management functions and studies.

**ROUTINE USE-DISCLOSURE TO THE DEPARTMENT OF JUSTICE FOR LITIGATION**

A record from a system of records maintained by this component may be disclosed as a routine use to any component of the Department of Justice for the purpose of representing the Department of Defense, or any officer, employee, or member of the Department in pending or potential litigation to which the record is pertinent.

**ROUTINE USE-DISCLOSURE TO MILITARY BANKING FACILITIES OVERSEAS**

Information as to current military addresses and assignments may be provided to military banking facilities who provide banking services overseas and who are reimbursed by the Government for certain checking and loan losses. For personnel separated, discharged, or retired from the Armed Forces, information as to last known residential or home of record address may be provided to the military banking facility upon certification by a banking facility officer that the facility has a returned or dishonored check negotiated by the individual or the individual has defaulted on a loan and that if restitution is not made by the individual, the U.S. Government will be liable for the loss the facility may incur.

**ROUTINE USE-DISCLOSURE OF INFORMATION TO THE GENERAL SERVICES ADMINISTRATION (GSA)**

A record from a system of records maintained by this component may be disclosed as a routine use to the General Services Administration (GSA) for the purpose of records management inspections conducted under authority of 44 U.S.C. 2904 and 2906.

**ROUTINE USE-DISCLOSURE OF INFORMATION TO THE NATIONAL ARCHIVES AND RECORDS ADMINISTRATION (NARA)**

**ROUTINE USE-DISCLOSURE TO THE MERIT SYSTEMS PROTECTION BOARD**

A record from a system of records maintained by this component may be disclosed as a routine use outside the DoD or the U.S. Government for the purpose of counterintelligence activities authorized by U.S. Law or Executive Order or for the purpose of enforcing laws which protect the national security of the United States.

Categories of records in the system:

Certain general and all special (BCD) courts-martial records of trial include a verbatim transcript of the trial and allied papers relating to the charged offenses and legal review of the case. General courts-martial examined pursuant to Article 69 and special (non-BCD) and summary courts-martial records of trial include only a summarized transcript of the trial as well as allied papers relating to the charged offenses, but do not necessarily include all records of review pursuant to Articles 69 or 73, Uniform Code of Military Justice.

Authority for maintenance of the system:
10 U.S.C. 801-940 (Uniform Code of Military Justice) and Executive Order 9397.

Purposes:
This record system is maintained because a verbatim transcript of all general courts-martial trials (except those examined pursuant to Article 69) and special courts-martial trials in which a bad conduct discharge (BCD) was approved, and a summarized transcript of all other courts-martial proceedings is required by law.

Records of trial are required by each office and individual responsible for reviewing the legality of the courts-martial findings and sentence, determining whether clemency consideration is warranted, and answering inquiries from offices and individuals concerning the status of a particular case.

Statistical data obtained from records of trial are used in determining jurisdiction and Army-wide trends on disciplinary infraction in the Armed Forces and serve as a guide for officials responsible for making local and Army-wide policy decisions regarding military justice activities.

All records of trial by general courts-martial and those special courts-martial records in which a bad conduct discharge (BCD) was approved are retained in the Office of the Clerk of the Court, US Army Judiciary, for 1-2 years after completion of appellate review. Thereafter, the records are forwarded to the Washington National Records Center, Suitland, MD, for permanent storage.

Records of trial by special courts-martial (non-BCD) and summary courts-martial are retained in the staff judge advocate office of the general courts-martial authority for 1 year after completion of supervisory review. Thereafter the records are held for 2 years in the record holding area or overseas records center. Records are then sent to National Personnel Records Center (Military Records), St. Louis, MO 63132, where they are retained for 7 years. Thereafter, the records are destroyed and the remaining evidence of conviction in the special (non-BCD) and summary courts-martial promulgating orders maintained in the individual's permanent records and any review(s) of the cases conducted pursuant to Articles 69 or 73, UCMJ are destroyed.

The original reviews of special (non-BCD) and summary courts-martial cases and a copy of all other reviews pursuant to Articles 69 or 73, UCMJ are maintained for 3 years in the Office of the Chief, Examination and New Trials, US Army Judiciary, Falls Church, VA. Paper records are retrieved by date; microfiche is retrieved by subject (based on Alpha Numeric Filing System) and within the subject, by individually identified by card number, year, and sequence number names if appropriate. Primary access to the automated index is accomplished through a document control number.

Safeguards:
Records are controlled; access to information from specified documents is restricted to persons who have been designated by their agency to have official need for the information in the performance of their duties. ARSTAF agencies are linked to the automated index by on-line terminals, thereby sharing a common data base, but do not have access to the record itself.

File areas within the Secretariat and the Office, Chief of Staff and certain ARSTAF file areas are protected by electronic surveillance systems with combination lock doors. All other file areas (within ARSTAF) are protected consistent with the sensitivity of Privacy Act data included therein. Users of the system receive training designed to preclude misuse or unauthorized disclosure of information.

Retention and disposal:
Non-policy documents are kept 10 years. They are converted to microform and destroyed after verification that the microform is an acceptable substitute for the original document. The hard copy and microform remain in current files area for 2 years after completion of action; then are retired to the Washington National Records Center (WNRC).

Policy action files are permanent. Original documents are converted to microform. The hard copy and microform remain in current files area for 2 years, then are retired to WNRC. The hard copy is destroyed at a future date when the microform is properly certified to meet archival standards set by General Services Administration.

Information in the automated index is kept permanently. At the beginning of each calendar year the index of all permanent documents transferred to the central repository is transferred to tape. The tape is kept in-house to support Army operations and is destroyed when no longer needed for current operations. A duplicate copy of that tape is transferred to the Machine Readable Archives, National Archives and Records Service, GSA.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

When a valid request for an investigation, the request package is given a control number and placed in a case folder (paper record) together with identification data concerning the subject of the request for investigation and control number. The request is entered into an automated data processing system (U.S. Army Intelligence and Security Command case control system), which is designed to provide statistical data and case control management information on the number and types of investigations that are opened, currently pending, and closed in U.S. Army Intelligence and Security Command. This automated system triggers automatic requests upon the Defense Central Index of Investigations (DCII), a master index that holds reference to all Department of Defense investigations conducted by U.S. Army Intelligence and Security Command and the Military Services investigative file repositories. If there are files on the subject, a request is generated by U.S. Army Intelligence and Security Command upon the appropriate repository. Upon review of the request package and other investigative files retrieved through DCII, investigators determine by the U.S. Army Intelligence and Security Command Office investigative leads are dispatched to the U.S. Army Intelligence and Security Command investigative elements and other pertinent Government investigative agencies. Upon receipt of the investigative file, a duplicate investigative file is prepared for the receiving field element. This file contains investigatory report and case control information, only to the specific investigative leads assigned to the controlling field element. At this point the U.S. Army Intelligence and Security Command investigative file enters into a pending status. During this pending status, investigative reports are prepared by U.S. Army Intelligence and Security Command field elements and sent to the control office, based upon record and interview data obtained during the investigation. Upon completion of the investigation, the closed investigative file held by the U.S. Army Intelligence and Security Command Control Office is forwarded through the IRR to the requestor for the investigation. Upon receipt, the requestor adjudicates the investigation and returns it to the IRR for retention.

The duplicate files prepared by the U.S. Army Intelligence and Security Command field elements are destroyed 120 days after the closing.

Storage:

Paper records in file folders, rolled microfilm, and microfiche.

Retrievability:

File folders are maintained in terminal digital order by regular dossier number and Social Security Number. In order to obtain the dossier number of the subject at least one personal identifier is required. For those subjects who have no identifying data such as birth, military service number or Social Security number, the name only index is searched. Additionally, a nonstandard search is required. The name only index will provide a subject's name and dossier number only. The nonstandard search will provide a listing of all subjects with identifying data. In these instances, some other identifying data must be furnished such as address. Dossiers possibly identical with the subject may be forwarded to the requestor.

Microfiche files are maintained in duplicate copy in separate locations of microfilm Division, IRR. The records are maintained in terminal digital order according to regular dossier number or Social Security Number.

Microfiche films are retrieved by name or dossier number.

Safeguards:

Building is under 24-hour guard and accessible only to authorized personnel. Only individuals accredited as file procurement officers may obtain and review IRR investigative records. Subordinate U.S. Army Intelligence and Security Command elements and other official requesters are required to have General Services Administrative approved containers for the storage of investigative files. Certified mail is used to forward any investigative files to official requesters of U.S. Army Intelligence and Security Command subordinate elements.

The primary purpose of UCAS is to provide a central database containing all information required to in-process or out-process individuals within a USAREUR community. This data base is shared among five community work centers that need information on arriving and departing personnel. These work centers, the Central Processing Facility, Personnel Services Company, Finance Office, Housing Office and the Transportation Office, have access to certain portions of the UCAS data base. Data base information updates made by each work center are shared by all work centers that need the information. The centralized data base reduces in-processing and out-processing time since individuals no longer need to furnish the same information at each work center.

DEFENSE MAPPING AGENCY

How Systems Of Records Are Arranged

The Defense Mapping Agency records are grouped by subject series. Each series has records about a specific activity or function to which a subject title and number is given. Systems or records are grouped in the same way. For example, a system of records on personnel security clearances may be found in Personnel Security Files - B0504-01 and one about military personnel assignments may be found in Military Services Administrative Record Files - B0614-02. These numbers are part of the system identification (ID) which precedes the notices in the Federal Register. They look like this: B0504-01 HQ.HT.A; B0614-02 HQ.A. The letter B means Defense Mapping Agency. The first four digits (0504 and 0614) show that the records pertain to Personnel Security and Military Personnel respectively; and the last two are a further breakdown of the series. The letters that follow these numbers are internal management accounting devices only. Other systems of records which differ from these examples but have similar documents may also be found in the same series.

How To Use The Index Guide

The systems of records maintained by the Defense Mapping Agency are contained within the subject series that are listed below. This list identifies each series in the order in which it appears in this issuance. Use the list to identify subject areas of interest. Having done so, use the series number (for example 0504 for Personnel Security) to locate the systems of records grouping in which you are interested.

REQUESTING RECORDS

Records are retrieved by name or by some other person identifier. It is therefore especially important for expeditious service when requesting a record that particular attention be provided to the Notification and/or Access Procedures of the particular record system involved so as to furnish the required personal identifiers, or any other pertinent personal information as may be required to locate and retrieve the record.

BLANKET ROUTINE USES

Certain blanket "routine uses" of the records have been established that are applicable to every record system maintained within the Department of Defense unless specifically stated otherwise within a particular record system. These additional blanket routine uses of the records are published below only once in the interest of simplicity, economy and to avoid redundancy before the individual record system notices begin rather than repeating them in every individual record system.

ROUTINE USE-LAW ENFORCEMENT

In the event that a system of records maintained by this component to carry out its functions indicates a violation or potential violation of law, whether civil, criminal or regulatory in nature, and whether arising by general statute or by regulation, rule or order issued pursuant thereto, the relevant records in the system of records may be referred, as a routine use, to the appropriate agency, whether Federal, state, local, or foreign, charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, rule, regulation or order issued pursuant thereto.

ROUTINE USE-DISCLOSURE WHEN REQUESTING INFORMATION

A record from a system of records maintained by this component may be disclosed as a routine use to a Federal, state, or local agency maintaining civil, criminal, or other relevant enforcement information or other pertinent information, such as current licenses, if necessary to obtain information relevant to a component decision concerning the hiring or retention of an employee, the issuance of a security clearance, the letting of a contract, or the issuance of a license, grant or other benefit.

ROUTINE USE-DISCLOSURE OF REQUESTED INFORMATION

A record from a system of records maintained by this component may be disclosed to a Federal agency, in response to its request, in connection with the hiring or retention of an employee, the issuance of a security clearance, the reporting of an investigation of an employee, the letting of a contract, or the issuance of a license, grant or other benefit by the requesting agency, to the extent that the information is relevant and necessary to the requesting agency's decision on the matter.

ROUTINE USE-CONGRESSIONAL INQUIRIES

Disclosure from a system of records maintained by this component may be made to a Congressional office from the record of an individual in response to an inquiry from the Congressional office made at the request of that individual.

ROUTINE USE-PRIVATE RELIEF LEGISLATION

Relevant information contained in all systems of records of the Department of Defense published on or before August 22, 1975, may be disclosed to the Office of Management and Budget in connection with the review of private relief legislation as set forth in OMB Circular A-19 at any stage of the legislative coordination and clearance process as set forth in that Circular.

ROUTINE USE-DISCLOSURES REQUIRED BY INTERNATIONAL AGREEMENTS

A record from a system of records maintained by this component may be disclosed to foreign law enforcement, security, investigatory,

**ROUTINE USE-DISCLOSURE TO STATE AND LOCAL TAXING AUTHORITIES**

Any information normally contained in IRS Form W-2 which is maintained in a record from a system of records maintained by this component may be disclosed to state and local taxing authorities with which the Secretary of the Treasury has entered into agreements pursuant to Title 5, U.S. Code, Sections 5516, 5517, 5520, and only to those state and local taxing authorities for whom military personnel or was subjects or was subject to tax regardless of whether tax is or was withheld. This routine use is in accordance with Treasury Fiscal Requirements Manual Bulletin Nr. 76-07.

**ROUTINE USE - DISCLOSURE TO THE OFFICE OF PERSONNEL MANAGEMENT**

A record from a system of records subject to the Privacy Act and maintained by this component may be disclosed to the Office of Personnel Management concerning information on pay and leave, benefits, retirement deductions, and any other information necessary for the Office of Personnel Management to carry out its legally authorized Government-wide personnel management functions and studies.

**ROUTINE USE-DISCLOSURE TO THE DEPARTMENT OF JUSTICE FOR LITIGATION**

A record from a system of records maintained by this component may be disclosed as a routine use to any component of the Department of Justice for the purpose of representing the Department of Defense, or any officer, employee or member of the Department in pending or potential litigation to which the record is pertinent.

**ROUTINE USE-DISCLOSURE TO MILITARY BANKING FACILITIES OVERSEAS**

Information as to current military addresses and assignments may be provided to military banking facilities who provide banking services overseas and who are reimbursed by the Government for certain checking and loan losses. For personnel separated, discharged, or retired from the Armed Forces, information as to last known residential or home of record address may be provided to the military banking facility upon certification by a banking facility officer that the facility has a returned or disbursed check negotiated by the individual or the individual has defaulted on a loan and that if restitution is not made by the individual, the U.S. Government will be liable for the losses the facility may incur.

**ROUTINE USE-DISCLOSURE OF INFORMATION TO THE GENERAL SERVICES ADMINISTRATION (GSA)**

Certain blanket 'routine uses' of the records have been established that are applicable to every record system maintained within the Department of Defense unless specifically stated otherwise within a particular record system. These additional blanket routine uses of the records are published below only once in the interest of simplicity, economy and to avoid redundancy before the individual record system notices begin rather than repeating them in every individual record system.

Also, any combination of data in the file can be used to select individual records. Only authorized personnel have required information access to the system or process jobs.

**Safeguards:**

Paper records are maintained in files accessible only to authorized personnel.

**Authorized records:**

A. Description of the automated process. Current hard copy records of all information are kept in locked file cabinets in limited access school offices. Computer-produced student records and reitetal part of the manual system are retained in limited access school offices and/or locked cabinets. Computer disks, tapes, etc., are maintained in limited access areas within the various computer centers, regional offices, and/or schools. Approved special requests for data can be supported by ad hoc inquiry. Any combination of data can be accessed to individual records for special processing.

B. Physical safeguards. Computer facilities and remote terminals are located in schools and regional offices throughout the school system. Particular regional systems vary; however, the same basic security measures are employed (in various combinations) in all the systems.

Computer hardware disk cards and other materials are secured in locked facilities after normal duty hours or are maintained in secure military computer centers. During school hours, storage media is secured in cabinets to which access can be limited. On-line access can be protected by combinations of the following factors: (1) Users must have file and/or disk names; (2) users must have possession or approval to gain possession of appropriate disk(s); and, (3) users must have officially designated codes and/or keys to permit read/write operations.

C. Storage media. Hard copy files are stored in the school offices of each participating school and regional offices. Computer files are stored on magnetic disks, and promotion of failure. Included are report cards and similar or related documents.

UNITED STATES AIR FORCE
How Systems of Records are Arranged

In the Air Force, records are grouped by subject series. Each series has records about a specific activity or function to which a subject title and number is given. Systems of records are grouped in the same way. For example, a system of records on personnel security clearances may be found in "Security—205," and one about psychiatry in "Medical Service—160". These numbers are part of the system identification which precede the notices. They look like this: F205 AF SP A or F160 ARPC A. The letter "F" means Air Force. The first three digits (205 and 160) show that the records pertain to Security and the Medical Service respectively. The letters that follow indicate to whom the system applies and or the Office of Primary Responsibility (OPR). For example, F205 AF SP A—AF indicates that this is an Air Force-wide system, with SP denoting Security Police as the OPR. The last alpha designation is for internal management control. In the records system F160 ARPC A—ARPC indicates that this is an Air Reserve Personnel Center (ARPC) system and applies to Reserve personnel only.

Using the Index Guide

The systems of records maintained by the Air Force are contained within the subject series that are listed below. This list identifies each series in the order in which it appears in this issuance. Use the list to identify subject areas of interest. Having done so, use the series number (for example 205 for Security) to locate the systems of records grouping in which you are interested.

REQUESTING RECORDS

Records are retrieved by name or by some other personal identifier. It is therefore especially important for expeditious service when requesting a record that particular attention be provided to the Notification and/or Access Procedures of the particular record system involved so as to furnish the required personal identifiers, or any other pertinent personal information as may be required to locate and retrieve the record.

BLANKET ROUTINE USES

Certain blanket 'routine use' of the records have been established that are applicable to every record system maintained within a particular record system. These additional blanket routine uses of the records are published below only once in the interest of simplicity, economy and to avoid redundancy before the individual record system notices begin rather than repeating them in every individual record system.

ROUTINE USE-LAW ENFORCEMENT

In the event that a system of records maintained by this component to carry out its functions indicates a violation or potential violation of law, whether civil, criminal or regulatory in nature, and whether arising by general statute or by regulation, rule or order, the relevant records in the system of records may be referred, as a routine use, to the appropriate agency, whether Federal, state, local, or foreign, charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, rule, regulation or order issued pursuant thereto.

ROUTINE USE-DISCLOSURE WHEN REQUESTING INFORMATION

A record from a system of records maintained by this component may be disclosed as a routine use to a Federal, state, or local agency maintaining civil, criminal, or other relevant law enforcement information or other pertinent information, such as current licenses, if necessary to obtain information relevant to a component decision concerning the hiring or retention of an employee, the issuance of a security clearance, the letting of a contract, or the issuance of a license, grant or other benefit.

ROUTINE USE-DISCLOSURE OF REQUESTED INFORMATION

A record from a system of records maintained by this component may be disclosed to a Federal agency, in response to its request, in connection with the hiring or retention of an employee, the issuance
of a security clearance, the reporting of an investigation of an employee, the letting of a contract, or the issuance of a license, grant or other benefit by the requesting agency, to the extent that the information is relevant and necessary to the requesting agency's decision on the matter.

ROUTINE USE-CONGRESSIONAL INQUIRIES

Disclosure from a system of records maintained by this component may be made to a Congressional office from the record of an individual in response to an inquiry from the Congressional office made at the request of that individual.

ROUTINE USE-PRIVATE RELIEF LEGISLATION

ROUTINE USE-DISCLOSURES REQUIRED BY INTERNATIONAL AGREEMENTS

A record from a system of records maintained by this component may be disclosed to foreign law enforcement, security, investigatory, or administrative authorities in order to comply with requirements imposed by, or to claim rights conferred by, international agreements and arrangements including those regulating the stationing and status in foreign countries of Department of Defense military and civilian personnel.

ROUTINE USE-DISCLOSURE TO STATE AND LOCAL TAXING AUTHORITIES

Any information normally contained in IRS Form W-2 which is maintained in a record from a system of records maintained by this component may be disclosed to state and local taxing authorities with which the Secretary of the Treasury has entered into agreements pursuant to Title 5, U.S. Code, Sections 5516, 5517, 5520, and only to those state and local taxing authorities for which an employee or military member is or was subject to tax regardless of whether tax is or was withheld. This routine use is in accordance with Treasury Fiscal Requirements Manual Bulletin Nr. 76-07.

ROUTINE USE-DISCLOSURE TO THE OFFICE OF PERSONNEL MANAGEMENT

A record from a system of records subject to the Privacy Act and maintained by this component may be disclosed to the Office of Personnel Management concerning information on pay and leave, benefits, retirement and đshon, and any other information necessary for the Office of Personnel Management to carry out its legally authorized Government-wide personnel management functions and studies.

ROUTINE USE-DISCLOSURE TO THE DEPARTMENT OF JUSTICE FOR LITIGATION

A record from a system of records maintained by this component may be disclosed as a routine use to any component of the Department of Justice for the purpose of representing the Department of Defense, or any officer, employee or member of the Department in pending or potential litigation to which the record is pertinent.

ROUTINE USE-DISCLOSURE TO MILITARY BANKING FACILITIES OVERSEAS

Information as to current military addresses and assignments may be provided to military banking facilities who provide banking services for military personnel who are reimbursed by the Government for certain checking and loan losses. For personnel separated, discharged, or retired from the Armed Forces, information as to last known residential or home of record address may be provided to the military banking facility upon certification by a banking facility officer that the facility has a returned or dishonored check negotiated by the individual or the individual has defaulted on a loan and that if restitution is not made by the individual, the U.S. Government will be liable for the losses the facility may incur.

Categories of records in the system:
The principal digital record maintained at each PDS operating level is the master personnel record, which contains the following categories of information:
1. Accession data pertaining to an individual's entry into the Air Force (place of enlistment, source of commission, home of record, date of enlistment, place from which ordered to EAD).
2. Education and training data, describing formal and type of education and training, civilian or military (academic education level, major academic specialty, professional specialty courses completed, professional military education received).
3. Utilization data used in assigning and reassigning the individual, determining skill qualifications, awarding Air Force Specialty Codes, determining duty location and job assignment, screening/individual for overseas assignment, performing strength accounting processes, etc. (Primary Air Force Specialty Code, Duty and Control Air Force Specialty Code, personnel accounting symbol, duty location, up to 24 previous duty assignments, aeronautical rating, data, departed last duty station, short tour return date, reserve section, current/las duty station, short tour return date, reserve section, current/last overseas tour).
4. Evaluation data on members of the Air Force during their career (Officer Effectiveness Report dates and ratings, Airman Performance Report dates and ratings, result of various qualification tests, an "Unfavorable Information" indicator, and Drug and Alcohol Abuse data).
5. Promotion data including promotion history, current grade and or selection for promotion (current grade, date of rank and effective date; up to 10 previous grades, dates of rank and effective dates projected temporary grade, key "service dates").
6. Compensation data although PDS does not deal directly with paying, Air Force members, military pay is largely predicated on personnel data maintained in PDS and provided to the Air Force Accounting and Finance Center (AFAFC) as described in ROUTINE USES below (pay date, Aviation Service Code, sex, grade, pay status).
7. Sustentation data—information dealing with programs provided or actions taken to improve the life, personal growth and morale of Air Force members (awards and decorations, marital status, number of dependents, religious denomination of member and spouse, race relations education).
8. Separation and retirement data, which identifies an individual's eligibility and the reason for separation (date of separation, mandatory retirement date, projected or actual separation program designee and character of discharge). At the central processing site (AFMPC), other subsidiary files or processes are operated which are integral parts of PDS: (a) Procurement Management Information System (PROMIS) is an automated system designed to enable the USAF to exercise effective management and control of the procurement personnel required to meet the total scheduled manpower requirements necessary to accomplish the Air Force mission. The
system provides the recruiter with job requirement data such as necessary test scores, Air Force Specialty Code, sex, date of enlistment, and other personal data required for the particular Airman's discipline (name, date of birth, etc.—to reserve the job for him or her. (b) Career Airman Reenlistment Reservation System (CAREERS) is a selective reenlistment process that manages and controls the numbers by using a priority system that calculates a point total for each Airman, establishing established objectives for accomplishing the Air Force mission. A centralized data bank contains the actual number, by quarter, for each Air Force Specialty Code (AFSC) that can be allowed to reenlist for each AFSC. The initial processing of personnel data includes recording data associated with the points earned by each Airman, stating his eligibility (AFSC), grade, active military service time, etc. If a vacancy exists, a reservation by name, SSN, etc.—will be made and issued to the CBPO during the reenlistment. (c) Airman Accession/Recruitment is a system that establishes the personal data (entire personnel record) to establish a personal data record and gain it to the Master Personnel File of the Air Force. The initial record data is captured through the established interface with the Processing and Classification Enlistees System (PACE) at Basic Military Training, Lackland Air Force Base, for non-prior service; for prior service enlists the basic data (name, SSN, DOE, grade, etc.) is input directly by USAF Recruiting Service and updated and completed by the initial gaining CBPO. (d) Officer Accession is the process whereby each of the various, Air Force sources of commissioning (AF Academy, AFROTC, Officer-Training School, etc.) project their graduates in advance allowing management to select by specialty, availability, and how many can be called to active duty when, by entering into the record an initial assignment and projected entry on Active Duty date. On that date the individual’s record is accessed to the active Master Personnel File of the Air Force Technical Management Information System (TRAMIS) is a system dealing with the Technical Training activities controlled by Air Training Command. The purpose of the system is to integrate the training program, specialty, and student accounting to personal data system. TRAMIS consists of numerous files which constitute “quota banks” of available training spaces, in specific courses, projected for future use based on estimated training requirements. Files include such data as: Course Identification Numbers, Class Start and Graduation Dates, Length of Training, Weapon System Indentification, Training Priority Designators, Responsible Training Centers, Trainee Names, SSN (and other pertinent personnel data) on individuals scheduled to attend classes. (f) Training Pipeline Management Information System (TRAPMIS) is an automated quota allocating system which deals with specialized combat aircrew training and aircrew survival training. Its files constitute a “quota bank” against which training requirements are matched and satisfied and through which trainees are scheduled in “pipeline” fashion to accommodate the individual’s scheduled geographical movement from school to school to end assignment. Files contain data concerning trainees by such names as SSNs and other pertinent personnel data on members being trained. (g) Air Force Institute of Technology (AFIT) Quota Bank File reflects program quotas by academic specialty for each fiscal year (current plus two future years). A quota is a series of programs (all of the same academic specialty). The financial Quota Bank file reflects the total number of quotas for each academic specialty. Officer assignment processes against the APIT Quota Bank file to reflect the fill of APIT Quotas. Examples of this data are: APIT Specialty, APIT Level, Fiscal Year, Name of Incumbent selected, projected, filing APIT Quota. (h) Job File is derived from the Authorized Record and is accessible by Position Number. Resource managers can use the Job File to validate authorizations by Position Number for assignment action and also to make job offers to individual officers. Internal suspension within the Job File occurs based upon Resource Managers update transactions. Data in the file includes: Position Number, Duty AFSC, Functional Account Code, Program Element, Location, and name of incumbent. (i) Casualty subsystem is composed of transactions which may be input at Headquarters Air Force and/or CBPOs to report death or serious illness of members from all components. A case file is maintained in the system to record information on individuals who have died. Basic identification data and unique data such as country of occurrence, date of incident, casualty group, aircraft involved in the incident and military status are recorded and maintained in this file. (j) Awards/Decorations are recorded and maintained on all component personnel in the headquarters Air Force master files. Analysis and evaluation and separation and awards, Good Conduct Medal, etc. (k) Airforce Master File/HAF. A hierarchical statistical file is built at AFMPC which reflects an aggregation of approvals/disapprovals by category of decoration. This file is not capable to identify any identifiable data. All individually identifiable data is maintained on the Master Personnel File. Such information as the type of decoration, awarding authority, special order number and date of award are identified in an individual’s record. Several occurrences for all decorations are stored; however only specific data on the last decoration. (l) Point of the Point of the Airman Reporting System (PCARS) is an Air National Guard/Air Force Reserve Unique supported by PDS. Its basic purpose is to maintain and account for retirement/retention points accrued as a result of participation in the program. The system is composed of identification data which is associated with a calendar of points, earned by participation in the Reserve program. Each year an individual’s record is closed and point totals are accumulated in history, and a point is provided to the Died on Active Duty and various retention and retirement. (m) Human Reliability/Personnel Reliability File is maintained at Headquarters Air Force in support of Air Force Regulation 35-99. It is not part of the Master Personnel Files but a free standing file which is updated by transactions from CBPOs. The file was established to specifically identify individuals who have become permanently disqualified under the provisions of the above regulations. A record is maintained on each disqualified individual which includes basic identification data, service, status, and reason for disqualification. (m) Variable Incentive Pay (VIP) File for medical officers contains about 125 character records on all Air Force physicians and is specifically used to identify whether an individual is participating in the Continuation Pay or Variable Incentive Pay program. Update to this file is provided by the Surgeon (AFMPC), the Air Force Accounting and Finance Center and directly from changes to the Master Personnel File. Besides basic identification data an individual’s record includes: source of appointment, status of assignment, amount of VIP or Continuation Pay and the dates of authorization and the dates and reason for separation. (n) Weighted Airman Promotion System: (1) The Text Scoring and Reporting System (TSRS) provides for identifying promotion eligibles from transactions by CBPOs. The file is maintained by the CBPO to control, monitor, and operate WAPS testing functions; editing and scoring WAPS test answer cards at AFMPC; reporting output for maintaining historical and analytical files at AFMPC and the Human Resources Laboratory (HRL) and includes the central identification of AFPC of individuals eligible for testing. (2) The Personnel Data Reporting Subsystem (PDRS) provides for identifying promotion eligibles at CBPOs from selected promotion data; merging test and weighted promotion data at AFMPC to effect promotion scoring, assigning the promotion objective and aligning selects in promotion priority sequence, maintaining projections on promotion selects at AFMPC, MAJCOM, and the CBPO, updating these projections monthly; creating output products to monitor the flow of data in the system; maintaining promotion historical and analytical files and reports at AFMPC. (3) Districts, branch, extension information, time in service, and airman performance report history is used to support this program. (o) Retired Personnel Data System (RPSD) is made up of four files—Retired Officer Management File and Retired Enlisted Management File. Data on records on members in retired status and the Retired Officer and Airman Loss Files containing records on former retirees who have been lost from rolls, usually through death. The RPSD is used to produce several address listings for the Retired Newsmaker, statistical reports for budgeting, to manage the Advance Program, the Temporary Disability Retirement List, Age 59 rosters for ARPC, General Officer roster, and statistical digest data for management analysis functions. Data is extracted from the master files on retirement from Active Duty or Reserves. Data includes: Name, SSN, grade data, service data, education data, retirement data and address. (p) Separated Officer File contains historical information on officers who leave the Air Force via separation, retirement, or death. Copies are sent to Human Resources Lab and Washington offices for research purposes. The data comprises the Master Personnel Record in its entirety and is captured 30 to 60 days after separation from the Air Force. (q) Airman Gain/Loss File includes data extracted from the Airman Master file when accession and separation (gains and losses) occur. This file, like the Separated Officer File, is used for historical reports regarding strength changes. Data includes name, SSN, and other data that reflects strength, i.e., promotions, reassignment, data specialty codes, etc. (r) Air Officer and Airman Separation Subsystem is used to process, track, approve, disapprove and project separations from the Air Force and transfers between components of the Air Force. The input to this subsystem is the Active Reserve MFPS. Data includes that specifically related to separations, e.g., Date of Separation, Separation Program Designator, waivers, etc. (s) The Retirements Subsystem is used to process and track applications for retirement and project separations. This subsystem uses the Master Files for Active Duty and Reserve officers and airmen.
application data, date of separation, waiver codes, disapproval reason codes, Separation Program Designator, Title 10 U.S.C. section, etc. (f) Retired Orders Log is a computer produced retirement orders routine that processes information recorded when approval or cessation of service dates, and physical clearance have been entered into system. The orders log contains data found in administrative orders for retirement, including name, SSN, grade, order number, effective date, etc. This log is used to generate retirement orders and as a cross-reference between orders, revocations and amendments. (u) General Officer Subsystem of PDS contains data extracted from the Master Personnel File and language qualification data and assumption history data maintained by the Assistant for General Office Matters. A record is maintained on each general officer and general officer selectee. The general office files are updated monthly and are used to produce products used in the selection/identification of general officers for applicable assignments. (v) Officer Structure Simulation Model (OSSM) provides officer force descriptions in various formats for existing, predictive or manipulated structures. It functions as a planning tool against which policy options can be applied so as to determine the impact of such policy decisions. The (OSSM) input records contain individual identification data from the Master Personnel Record, but all output is statistical. (w) Widow's File is maintained on magnetic tape and updated by the office of primary responsibility. When required, address labels and listings are produced by employing selected PDS utility programs. The address labels are used to forward the Retired Newsletter to widows of active-duty and retired personnel. The listings are used for management control of the Widow's file and name, address, and SSN of the widow. Additionally, the deceased sponsor's name, SSN, date of death, and status at time of death are maintained. (x) Historical Files are files with a retention period of 365 days or more. They contain long-term copies of files, and are primarily for aggregation and analysis of statistical data, although individual records may be accessed to meet ad hoc requirements. (y) Miscellaneous files, records, and processes are a number of work files, inactive files with a less-than-365 day retention period, intermediate records, and processes relating to statistical compilations, computer operation, quality control and problem diagnosis. Although they may contain individual-identifying data, they do so only as a by-product of the general purpose of their file. There is no list of people about whom this file contains data. (z) Civilian employment information including authorization for position, personnel data, suspension information; position control information; projected information and historical information; civilian education and training data; performance appraisal, ratings, evaluations of potential; civilian historical files covering job experience, training and transactions; civilian awards information, merit promotion plan work files; career programs files for such functional areas as procurement, logistics, civilian personnel, etc.; civilian separation and retirement data for reports and to determine eligibility; adverse and disciplinary data for statistical analysis and employee assistance; stand-alone files, as for complaints, enrollee programs; existing data from other systems to produce reports; files or for immediate access display on remote computer terminals; miscellaneous files, as described in item (y) above. (aa) Aviator Continuation Pay is used to identify where the officer is participating in the Continuation Pay Program. Updated data includes Air Force, AFMPC/DPMAT, the Air Force Accounting and Finance Center, and directly from changes to the Master Personnel File. Identification data on an individual record includes amount of continuation pay, ADSC, and bonus eligibility date.

Purpose:
The Air Force operates a centralized personnel management system in an environment that is widely dispersed geographically and encompasses a population that is diverse in terms of qualifications, experience, and military status. The major centers of Air Force personnel management: Washington, DC, where the current major policy and long-range planning/programming decision are made; the Air Force Manpower and Personnel Center at Randolph Air Force Base, TX, which performs most personnel operations-type
functions for the active duty components of the force; and the Air
Reserve Personnel Center at Denver, CO, which performs certain
operational functions for the Reserve components of the force. Of-
ces at Major Command Headquarters, State Adjutant Generals, and
Air Force field operating agencies (AFOs) are responsible for the
operation of the AFMSC for which they are responsible. The structure of the Air Force
and its personnel management system, the composition of the force, and the Air Force’s stated objective of treating people as individuals, i.e., giving due consideration to their needs as well as their ability, demand a dynamic data system that is capable of supporting the varying needs of the personnel managers at each echelon and operating
locations. It is to this purpose that the data in the Personnel Data System (PDS) is collected, maintained, and used.

A. Uses within the Air Force Personnel Community

1. HQ USAF

a. Uses within the Air Force Personnel Community, HQ USAF, Washington, DC; Deputy Chief of Staff, Personnel and his immediate staff; Director of Personnel Plans; Assistant for General Officer Matters; Assistant for Colonnel Assign-
ments; Reserve Personnel Division; Air National Guard Personnel Division; and the Surgeon General, the Chief of AF Chaplains and the Staff Judge Advocate, each of which perform certain personnel functions within their area of responsibility. Data from the central data base at the AFMSC is furnished Washington area agencies by
retrieval from the computer at Randolph via remote access devices and by provisions of recurring products containing required management
information, including computer tapes which are used as input to unique systems with which PDS interfaces. Although most of the data is used by policy makers to develop long-term plans and programs and track progress toward established goals, some individual
data is processed and returned to the agencies from which it was
obtained. The categories of persons managed by offices in the headquarters, e.g., General Officers, Colonels, Air National Guard personnel, etc. Air
Force Manpower and Personnel Center (AFMPC), Randolph Air
Force Base, VT, uses these data to select, train, and assign officers. The PDS is used to make decisions on individual actions to be taken in areas such as personnel procurement, education and training, classification, assignment, career development, evaluation, promotion, compensa-
tion, career and personnel affairs coordination, separation and retirement.

Air Reserve Personnel Center (ARPC), Denver, CO. Personnel managers at
ARPC perform many of the same functions for the Reserve components of the Air Force as the managers at the AFMSC perform for the active components. As with the Randolph data, ARPC obtains data from the central data base at AFMSC by retrieval through remote terminals and retrieving output products containing information necessary to their management processes. Major Command
Headquarters personnel operations are supported by the standards
and content of PDS records provided them by AFMSC. In addition, there is provided in the PDS record an “add-on” area which the
commands are authorized to use for the storage of data which will assist them in fulfilling unique personnel management requirements generated by their mission, structure, geographical location, etc. The standard functions performed fall generally under the same classifications as those of AFMSC, e.g., assignment, classification, etc. Nonstandard functions include provisions of unique aircrew data, production of specialty-tailored name listing, control of theatre orien-
ted training, etc. Some commands use PDS data—both standard and nonstandard—for functions which, although unique, are similar in
description in the Federal Register. Consolidated Base Personnel
Offices (CBPO) which represent the base-level aspect for PDS, are
the prime point of system-to-people interface. Supplied with a stan-
dard data base and system, CBPOs provide personnel management support to commanders and supervisors on a daily basis. Acting on
receipt of data from higher headquarters, primarily by means of
transactions processed through PDS, they notify people of selection
for reassignment, promotion, approval/disapproval of requests
for separation and retirement, and similar personnel actions. When cer-
tain events occur to an individual at the local level, e.g., volunteer
for overseas duty, reduction in grade, change in marital status, applic-
atations for leave, etc., the CBPOs are notified by the vertical system to transmit the requisite information to other manage-
ment levels and update the automated records resident at those
levels. CBPOs too are allotted an “add-on” area in the computer
record. CBPOs are supported by software permutations of the require-
ments such as local training scheduling, unique locator listing urinal-
ysis testing scheduling, etc.

B. Uses External to the Air Force Personnel Community

1. Headquarters for the AFMC

Automated interfaces exist between the PDS main data fields and the following systems of other functions: a. The Flight Records Data System (FRDS) maintained by the Air Force Inspection and Safety Center. The FRDS is a (1) Certain personnel identification data on rated officers is transferred monthly to the FRDS. This data flow creates the basic identifying data in the FRDS, insures compatibility with the PDS, and precludes duplica-
tive data collection and input generation by the AFISC. (2) Update of the personnel data to the FRDS generates return flow of flying hour data which is used at AFMC for rated resource distribution management. b. The Master Military Pay Account (MMPA), is the Joint Uniform Military Personnel System (JUMPS) managed by the Air Force Accounting and Finance Center (AFACF) at Denver, CO. The PDS transfers certain pay related data as changes occur to update the MMPA, e.g., promotions, separa-
tions, separations/retirements, name, SSN, grade. These data provid-
ed criteria for the AFACF to determine specific pay entitlements. c.
The AFACF maintains a separate pay system for Air National Guard
and Air Force Reserve personnel called the Air Reserve Pay and Allowances System (ARPAS). (1) PDS outputs certain pay related
data to ARPAS as changes occur, e.g., retirements, promotions, name, SSN, grade. These data form the criteria for the AFACF to determine specific Reserve pay entitlements. (2) ARPAS outputs data which affect accumulated point credits for Air National Guard and Air Force Reserve personnel to AFMC for point accumulation for the Point Credit Accounting and Reporting System (PCARS), a component of PDS. PCARS also receives monthly input from HQ Air National
Force which updates point credits as a result of completing an extension
Contribution correspondence program. d. AFACS procides data on
Variable Incentive Pay (VIP) for Medical Officers is used to
update a special control file within PDS and produce necessary
reports for management of the VIP program. e. Air Training Com-
mands makes a system wide change in oil type, affecting all PDS data for the categories of persons managed by offices in the headquarters, e.g., General Officers, Colonels, Air National Guard personnel, etc. Air
Force Manpower and Personnel Center (AFMPC), Randolph Air
Force Base, VT, uses these data to select, train, and assign officers. The PDS is used to make decisions on individual actions to be taken in areas such as personnel procurement, education and training, classification, assignment, career development, evaluation, promotion, compensa-
tion, career and personnel affairs coordination, separation and retirement.

Air Reserve Personnel Center (ARPC), Denver, CO. Personnel managers at
ARPC perform many of the same functions for the Reserve components of the Air Force as the managers at the AFMSC perform for the active components. As with the Randolph data, ARPC obtains data from the central data base at AFMSC by retrieval through remote terminals and retrieving output products containing information necessary to their management processes. Major Command
Headquarters personnel operations are supported by the standards
and content of PDS records provided them by AFMSC. In addition, there is provided in the PDS record an “add-on” area which the
commands are authorized to use for the storage of data which will assist them in fulfilling unique personnel management requirements generated by their mission, structure, geographical location, etc. The standard functions performed fall generally under the same classifications as those of AFMSC, e.g., assignment, classification, etc. Nonstandard functions include provisions of unique aircrew data, production of specialty-tailored name listing, control of theatre orien-
ted training, etc. Some commands use PDS data—both standard and nonstandard—for functions which, although unique, are similar in
description in the Federal Register. Consolidated Base Personnel
Offices (CBPO) which represent the base-level aspect for PDS, are
the prime point of system-to-people interface. Supplied with a stan-
dard data base and system, CBPOs provide personnel management support to commanders and supervisors on a daily basis. Acting on
receipt of data from higher headquarters, primarily by means of
transactions processed through PDS, they notify people of selection
for reassignment, promotion, approval/disapproval of requests
for separation and retirement, and similar personnel actions. When cer-
tain events occur to an individual at the local level, e.g., volunteer
for overseas duty, reduction in grade, change in marital status, applic-
atations for leave, etc., the CBPOs are notified by the vertical system to transmit the requisite information to other manage-
ment levels and update the automated records resident at those
levels. CBPOs too are allotted an “add-on” area in the computer
record. CBPOs are supported by software permutations of the require-
ments such as local training scheduling, unique locator listing urinal-
ysis testing scheduling, etc.

2. Base Level CBPO Interfaces

Certain interfaces have been established at base level to pass data to a particular mode of interface depends on the needs of the
receiving function and the capabilities of the system to produce the necessary data: a. The Flight Management Data System (FMDS) receives an automated flow of selected personnel data that might be passed to
the Congenying Planning Support Capability (CPSC) at six major command headquarters: Tactical Air Command, Strategic Air Command, National Air Traffic Command, United States Air Forces, Europe, and Pacific Air Forces. c. The record identifiable by individual’s name and SSN provides contingency and/or manning assistance temporary duty (TDY) being performed by the individual. Record is destroyed upon completion of the
TDY. d. Statistical records (gross statistics by skill and unit) are
generated for CPSC from PDS providing force availability esti-
mates. CPSC is described separately in the Federal Register.

The "Blanket Routines Uses" that appear at the beginning of the Department of the Air Force's compilation of systems of records apply to this system.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:
Maintained in visible file binders/cabinets, card files, on computer magnetic tapes, disks or computer paper printouts or microfiche.

Retrievability:
Identified by name or Social Security Number (SSN). The primary individual record identifier in PDS is SSN. Some files are sequenced and retrieved by other identifiers; for instance, the assignment action record is identified by an assignment action number. Additionally, at each echelon there exists computer programs to permit extraction of data from the system by constructing an inquiry containing parameters against which to match and select records. As an example, an inquiry can be written to select all Captains who are F-15 pilots, married, stationed at Randolph AFB, who possess a master's degree or less are administration; then display name, SSN, number of dependents and duty location. This is the added capability of selecting an individual's record or certain pre-formatted information by SSN on an immediate basis using a teletype or cathode ray tube display high-speed line printer located in the Washington, DC area, at Major Command and at ARPC to provide the transfer of volume products to and for the use of personnel managers at those locations.

Safeguards:
Records are accessed by custodian of the record system and by person(s) responsible for servicing the record system in the performance of their official duties where authorized, and properly screened and cleared for need-to-know, and by commanders of medical centers and hospitals. Records are stored in security file containers/cabinets, safes, vaults and locked cabinets, or rooms. Records are protected by guards. Records are controlled by personnel screening visitor registers and computer system software.

Retention and disposal:
Retained in office files until superseded, obsolete, no longer needed for reference, or on inactivation, then destroyed by tearing into pieces, shredding, pulping, macerating, or burning. Preceding retention statements apply to Analog output products of the Personnel Data System. Data stored digitally within system is retained only for the period required to satisfy recurring processing requirements and/or historical requirements. Files with a retention period of 364 days are permanently released at the end of their specified retention period. "Permanent history" files are retained for 10 years. Files 365 or more days old are defined as "historical files" and are not automatically released. Retention periods for categories of PDS files are:

1. In cycle in which a program or series of programs creating output is daily, the created magnetic tape file will be used for processing of next daily, then the retention will not be greater than 20 days.
2. In cycle in which a program or series of programs creating output is daily, and the created magnetic tape file will be used for processing of next weekly, then the retention will not be greater than 30 days.
3. In cycle in which a program or series of programs creating output is weekly, and the created magnetic tape file will be used for processing of next weekly, then the retention will not be greater than 30 days.
4. In cycle in which a program or series of programs creating output is monthly, and the created magnetic tape file will be used for processing of next monthly, then the retention will not be greater than 30 days.
5. In cycle in which a program or series of programs creating output is quarterly, and the created magnetic tape file will be used for processing of next quarterly, then the retention will not be greater than 90 days.
6. In cycle in which a program or series of programs creating output is semi-annual, and the created magnetic tape file will be used for processing of next semi-annual, then the retention will not be greater than 180 days.
7. In cycle in which a program or series of programs creating output is monthly, which is...
also used for processing of annual runs, then the retention will not be greater than 365 days. If cycle in which a program or series of programs creating output is monthly, and the created magnetic tape file will be used for processing of next monthly, which is also used for processing of permanent history, then the retention will be not greater than 190 days. If cycle in which a program or series of programs creating output is quarterly, and the created magnetic tape file will be used for processing of next quarterly, which is also used for processing of semi-annual run, then the retention will be not greater than 365 days. If cycle in which a program or series of programs creating output is quarterly, and the created magnetic tape file will be used for processing of next quarterly, which is also used for processing of semi-annual run, then the retention will be not greater than 365 days. If cycle in which a program or series of programs creating output is semi-annual, and the created magnetic tape file will be used for processing of next semi-annual, then the retention will be not greater than 190 days. If cycle in which a program or series of programs creating output is semi-annual, and the created magnetic tape file will be used for processing of annual runs, then the retention will be not greater than 365 days. If created magnetic tape file will be used for processing of permanent history, then the retention will be not greater than 365 days. If created magnetic tape file will be used for processing of semi-annual run, and the created magnetic tape file will be used for processing of annual runs, then the retention will be not greater than 365 days. If cycle in which a program or series of programs creating output is annual, and the created magnetic tape file will be used for processing of annual runs, then the retention will be not greater than 365 days. If cycle in which a program or series of programs creating output is annual, and the created magnetic tape file will be used for processing of annual runs, then the retention will be not greater than 365 days. If cycle in which a program or series of programs creating output is annual, and the created magnetic tape file will be used for processing of next annual, which is also used for processing of permanent history, then the retention will be not greater than 999 days. If the program or series of programs creating output is annual, and the created magnetic tape file will be used for processing as required, then the retention will be lowest possible retention commensurate to job completion. If the program or series of programs creating output is as required runs, and the created magnetic tape file will be used for processing as required, the retention will be lowest possible commensurate to job completion. If the program or series of programs creating output is test files, and the created magnetic tape file will be used for processing as required, then the retention will be not greater than 30 days. If the programs creating output includes punch/print backup and the created magnetic tape file will be used for processing as required, then the retention will be not greater than 10 days. In addition, for civilian personnel at base level (CCPO), master personnel records are transferred to the base level record center upon retirement or death of the employee. Any action file upon appointment of the employee or in the event the employee is not appointed and will no longer be considered a candidate for appointment, are destroyed by degaussing-master personnel file, including all indexes. Any separation from the separated personnel history file where they are retained for three years subsequent to separation and then destroyed by degaussing. The notification of personnel action—Standard Form 50—is disposed of as directed by OPM—work files are records such as the employee career brief, position survey work sheet, retention register work sheet, alphabetic and Social Security Number locator files, and personnel position control register are destroyed after use by tearing into pieces, shredding, pulping, macerating, or burning—work sheets pertaining to qualification and retention registers are disposed of as directed by OPM—transitory files such as pending files, and recovery files are destroyed after-use by degaussing—files and records retrieved through general retrieval systems are destroyed after use by tearing into pieces, shredding, pulping, macerating, or burning—Those records at AF Manpower and Personnel Center for the end of each fiscal year quarter are retained for five years before销毁 by destruction—the separated employee file retains employee information for a time of separation for five years after which the employee's record is destroyed by degaussing.

Purposes:
(1) Active: These records form the nucleus of the Master Cadet Personnel Record for candidates selected to attend the Academy. These records are used to record the academic, athletic and military training histories of cadets who attend the Academy. They provide a means of checking the performance of each cadet, recording all grades for completed courses, computing grade point averages, identifying deficiencies, and insuring all requirements for graduation are met. Grade information is used by cadets, Academy instructors, counselors, and advisors in selecting majors, determining academic requirements for specific majors, and scheduling courses. Computer listings are also used by faculty and staff members to readily identify cadets by squadron, class, and population or ethnic group. Academic Review Committees and the Academic Board use these records to evaluate cadet performance and to determine eligibility for continuance at the Academy.

(2) Historical: These records form a complete history of each cadet who attended the Academy. They record academic, athletic, and military performance of each cadet and to coordinate statistics relating to cadet strength and attrition. Files are reviewed by organizations within the Department of Defense to determine qualifications for assignments; by Air Force Reserve Officer Training Corps (AFROTC), recruiting and medical services units to determine qualifications and eligibility for training programs and for military service, and by the Air Force Military Personnel Center (AFMPC) to confirm or recreate a military service record.

Routine uses of records maintained in the system, including categories of users and the purpose of such uses:
Files are disclosed to the Federal Bureau of Investigation for conducting background investigations for security clearances, and to the Veterans Administration for determining eligibility for benefits. Academic and personnel information is released to nominating officials, and to the Western Athletic Conference (WAC) officials on cadets participating in WAC-sponsored intercollegiate athletics. The "Blanket Routine Uses" published at the beginning of the Air Force's compilation of records notices apply to this system.
